SUMMARY

Cybersecurity B.S. candidate (Minor: Computer Science) with programming experience in Python, Java, C++, SQL and strong fundamentals in Linux/Windows and networking. Seeking a cybersecurity/IT internship where I can apply security fundamentals, troubleshooting, and documentation skills in a team environment.

EXPERIENCE

Gold's Gym - Front Desk Associate

2024 – Present

[College Station, Tx]

- Managed member accounts (create/update/cancel) and resolved billing/access issues while protecting member information.
- Handled check-ins, customer questions, and issue escalation to maintain professional member experience.

Target Team Member

2021 – 2026

[Fort Worth, Tx]

- Executed merchandising standards (zoning, stocking, planograms) to maintain department readiness.
- Assisted customers with product location and issue resolution in a fast-paced environment.
- Collaborated with team leads to complete daily workload efficiently and accurately.

Deron Landscape Services - Team Lead

2020 – 2021

[Fort Worth, Tx]

- Led a crew delivering residential/light industrial landscaping projects on schedule and to customer requirements.
- Coordinated daily tasks, materials, and quality checks to ensure consistent results.

EDUCATION

B.S. Cybersecurity

2027

Texas A&M University- Commerce - RELIS Campus

College Station, TX

GPA: 3.0/4.0 Relevant Coursework: Networking, Operating Systems, Coding, Databases, Digital Forensics.

TECHNICAL SKILLS

Languages

Python, Java, C++, C, SQL, HTML, JavaScript

Tools

Wireshark, Git/GitHub, VirtualBox/VMware, Microsoft Office, Google Workspace, WSL, Linux, Windows

Concepts

Networking fundamentals (TCP/IP, DNS, DHCP), Digital Forensics, Cybersecurity

LEADERSHIP & ACTIVITIES

Chaplain

2023 – 2024

- Organized weekly small-group meetings and help build community among men.

Fundraising Chair

2022 – 2024

- Supported recruitment/onboarding and helped facilitate member programming.

TECHNICAL PROJECTS

Virtualized Cybersecurity Lab

01/12/2025

VirtualBox/VMware

- Built an isolated home lab using [VirtualBox/VMware], configuring NAT and Host-Only networks, snapshots, and baseline images for repeatable testing.

- Used Wireshark to capture and analyze DNS, DHCP, HTTP/HTTPS, and TCP handshakes, documented findings and common indicators of normal vs. suspicious traffic.
- Hardened a Windows VM by enabling firewall rules, applying updates, and validating exposure using Nmap from Kali in a controlled environment.
